## Instructions to the Students

- 1) You will find the answers to the questions in the lessons at the end of each lesson. Check the answers (*feedback*) after you have completed each question (*frame*). This way you will be sure that you understand the lesson. If you get an answer wrong, mark that frame with a cross so that you can discuss it with your tutor and other students in the group meeting.
- 2) The tests for the lessons are at the end of each lesson. You will be told when to do these in the lessons.
- 3) Apart from this study book, you will need a good **Exercise Book** into which you can write the answers to the special exercises assigned each week. Each lesson has its own exercise in which you will practice the skills that you have learned. These exercises are one of the most important parts of the course.

### Instructions on how to do the Exercises:

- a) Completely finish one exercise before beginning another so as not to confuse them in your mind.
- b) They require much time, so it is a good idea to do them one step at a time, giving yourself time in between each step to think about what still remains to be done.
- c) It is worth the trouble to do them on scrap paper first, then you can improve them before writing the finished copy in your exercise book.
